

Our Vision

for the

Future of Europe

The objective of this

VISION

is the

overall

Improvement

of

Quality of Life

in

Europe

Citizen:

The

Citizen

is the

EMANATION POINT

of

SOVEREIGNTY

The Citizen:

Currently

- Man is basically free
- Man is basically capable of rational decision
- Man is the original bearer and emanation point of all sovereignty - **in theory**
- The Basic Rights are stated in the UN Universal Declaration of Human Rights - but often infringed

The Vision

- **Man will have more freedom**
- Man's ability to rational decision will be enhanced
- **Man will be the original bearer and emanation point of all sovereignty - in practice**
- **Expanded Human Rights will be acknowledged and implemented at all Levels:
Private + Government**

Society:

a

Group of People

united by Agreement

for

Mutual Protection and Benefit

Society:

Currently

- Majority of Citizens have little awareness of society
- Society is mostly isolated, interest groups with little cooperative help, except in disasters and war
- Citizen's main contributions are by hated Taxation. Some countries require compulsory Military Service or Alternative Service

The Vision

- There will be much more awareness and willing contribution to society
- Mutual and synergistic support and help across society, involving all citizens in society
- The society will grow and blossom - with all ideas and contributions welcome from all areas

State:

Organised political community

under one government

The State:

Present

- Unapproachable by individual citizens
- Unaffected by individual and often groups of citizens
- Uses it's authority internally and externally with little or no reference to the public's wishes
- Covertly maintains the two class society of ruling class and subjects

Future/ VISION

- Known and effective channels for all to reach state organs.
Responsible to all citizens
- Through direct democracy this transforms into a classless pure civic society
- Operates internally and externally in direct accord with the citizen's choice - with the vision purpose as the key reason to act or not act

Government:

**a body of people
with the function of administering
and deciding on the affairs of the
STATE**

Government:

Present

- Main purpose is to stay in power
- Mostly reacting to short term affairs
- Representing the will of the people only to a small extent
- Patronising viewpoint towards the people
- The public order is more important than the public

Future/ Vision

- Main purpose is: the improvement of the quality of life
- Administering the long and short term affairs of the State
- Representing the will of the people to the largest possible extent
- Viewpoint of serving the people
- Basic Rights granted and exercised in the constitutional reality

Country:

**The territory that is controlled
by a state**

A new
